Week 3

Class Activity 4

Group Activity: Build Your Privacy

For each AI scenario below, choose the *best combination* of privacy techniques and explain how each technique helps protect the system.

Scenario	Goal / Privacy Requirement	Best Combo of Techniques	How They Meet the Requirements
1. Smart Healthcare Platform Hospitals collaborate on AI using sensitive patient data.	- Data must never leave hospitals- Joint model needs to be trained- Must ensure no individual patient can be re-identified		
2. Voice Assistant (e.g., Alexa) AI learns from voice data but raw recordings cannot be sent to the cloud.	- Local training- Protection of audio features- Prevent access to user data		
3. AI Education App Schools analyse student data across districts without revealing identities.	- Protect students' personal and performance data- Maintain high model accuracy- Enable cross-school insights
